

El Paso Community College
Syllabus
Part II
Official Course Description

SUBJECT AREA	<u>Information Technology Systems</u>
COURSE RUBRIC AND NUMBER	<u>ITSW 2334</u>
COURSE TITLE	<u>Advanced Spreadsheets</u>
COURSE CREDIT HOURS	<u>3 3 : 1</u> Credits Lec Lab

I. Catalog Description

Provides advanced techniques for developing and modifying spreadsheets. Includes macros and data analysis functions. "This is a Microsoft Office Specialist Certification course that prepares you to take a test to qualify you as a core user." **Prerequisite: ITSC 1301 or BCIS 1305. (3:1)**

II. Course Objectives

Upon successful completion of this course, the successful student will be able to:

A. Introduction to Electronic Spreadsheets

1. Define, describe, and load electronic spreadsheets and explain how Excel assists in business "what-if" analysis situations.
2. Review the creation of electronic spreadsheets including text, numbers, and formulas with functions.
3. Use the menu items and toolbars on electronic spreadsheet software to manipulate blocks of data and to control the work environment.
4. Use advanced formatting techniques to create professional documents.

B. Intermediate Spreadsheet Design

1. Create and modify a variety of charts and apply the basic concepts of OLE, Object Linking and Embedding.
2. Utilize additional Excel functions.
3. Manipulate and use data across worksheets and across workbooks.
4. Create links to other workbooks.
5. Use Excel tools like data tables to complete more advanced "what-if" analysis.

C. Advanced Spreadsheet Design

1. Utilize the Scenario Manager for advanced "what-if" analysis.
2. Use the Goal Seek tool for "what-if" analysis.

3. Use the features of Excel lists and the terminology that relates to how Excel can be used with database applications.
4. Utilize advanced skills to complete a complete real-world application to include cell protection, data validation, and conditional formatting.
5. Create macros for repetitive instructions and create shortcut keys and buttons to make the running of macros easier.

III. THECB Learning Outcomes (WECM)

1. Create and design macros.
2. Use data analysis features.
3. Develop solutions using linked worksheets.

IV. Evaluation

A. Pre-assessment

Students must have taken and completed either ITSC 1301 or BCIS 1305 prior to taking this course.

B. Post-assessment

This course will contain lab assignments and exams. The instructor will determine the mix of lab assignments and exams to arrive at a grade as described in the Instructor's Requirements document.

C. Remediation

The instructor may provide the students with means of improving a grade. The instructor will determine the timing, form, and method of remediation.

V. Disability Statement (Americans with Disabilities Act [ADA])

EPCC offers a variety of services to persons with documented sensory, mental, physical, or temporary disabling conditions to promote success in classes. If you have a disability and believe you may need services, you are encouraged to contact the Center for Students with Disabilities to discuss your needs with a counselor. All discussions and documentation are kept confidential. Offices located: VV Rm C-112 (831-2426); TM Rm 1400 (831-5808); RG Rm B-201 (831-4198); NWC Rm M-54 (831-8815); and MDP Rm A-125 (831-7024)

VI. 6 Drop Rule

Students who began attending Texas public institutions of higher education for the first time during the Fall 2007 semester or later are subject to a 6-Drop limit for all undergraduate classes. Developmental, ESL, Dual Credit and Early college High School classes are exempt from this rule. All students should consult with their instructor before dropping a class. Academic assistance is available. Students are encouraged to see Counseling Services if dropping because exemptions may apply. Refer to the EPCC catalog and website for additional information.
