El Paso Community College Syllabus Part II Official Course Description

SUBJECT AREA	Radiation Therapy Technology
COURSE RUBRIC AND NUMBER	RADT 1344
COURSE TITLE	Instrumentation and Methodologies
COURSE CREDIT HOURS	$\frac{3 2 : 4}{\text{Credits} \text{Lec} \text{Lab}}$
	Situits Let Lub

I. Catalog Description

Presents fundamentals of the technical and clinical aspects of radiation therapy. Includes principles of equipment operation, concepts of quality assurance instruction in medical imaging and miscellaneous procedures. A grade of a "C" or better is required to take the next course. (2:4). Lab fee.

II. Course Objectives

Upon satisfactory completion of this course, the student will be able to:

- A. Describe the components and the operation of a simulator, to include the radiographic, fluoroscopic, and CT units.
- B. Analyze the relationships of factors affecting image contrast, density, and resolution to determine optimal image quality.
- C. Apply techniques to enhance image details.
- D. Apply techniques to reduce image distortion.
- E. Select the most appropriate grid, film, and screen.
- F. Calculate penumbra, magnification factor, and percent magnification.
- G. Compare various films and intensifying screens available for portal localization and verification in radiation oncology.
- H. Describe the factors associated with digital image processing, display, and image data storage.
- I. Formulate a plan for darkroom safe light illumination.
- J. Discuss the possible causes and health implications of darkroom chemical sensitivity.
- K. Discuss the effects of processing and storage on image quality.
- L. Determine artifact types, cause, and preventive measures needed.
- M. Compare methods of silver recovery.
- N. Describe Occupational Safety and Health Administration (OSHA) standards affecting processing of film.
- O. Explain the basic principles of image formation for each of the following modalities: CT, MRI, Ultrasound, and Nuclear Medicine.
- P. Describe various safety and hazard procedures and policy standards.

III. THECB Learning Outcomes (WECM)

- 1. Explain the operation of radiation therapy treatment units.
- 2. Describe the benefits and application of a quality assurance program.
- 3. Explain x-ray production, including technical factors.

IV. Evaluation

A. Methods:

- 1. Homework and quizzes
- 2. Unit examinations
- 3. Comprehensive final examination
- B. Grading Scale:
 - $\begin{array}{l} 93 100 = A \\ 85 92 &= B \\ 75 84 &= C \\ 74 \mbox{ and below} = F \end{array}$

V. Disability Statement (American with/Disabilities Act [ADA])

EPCC offers a variety of services to persons with documented sensory, mental, physical, or temporary disabling conditions to promote success in classes. If you have a disability and believe you may need services, you are encouraged to contact the Center for Students with Disabilities to discuss your needs with a counselor. All discussions and documentation are kept confidential. Offices located: VV Rm C-112 (831-2426); TM Rm 1400 (831-5808); RG Rm B-201 (831-4198); NWC Rm M-54 (831-8815); and MDP Rm A-125 (831-7024).

VI. 6 Drop Rule

Students who began attending Texas public institutions of higher education for the first time during the Fall 2007 semester or later are subject to a 6-Drop limit for all undergraduate classes. Developmental, ESL, Dual Credit and Early College High School classes are exempt from this rule. All students should consult with their instructor before dropping a class. Academic assistance is available. Students are encouraged to see Counseling Services if dropping because exemptions may apply. Refer to the EPCC catalog and website for additional information.
