- C. The student will be graded on each assignment on uniqueness, conceptualization, and professionally finished work. An overall semester grade according to the performance rating scale will also be given.

Grading Scale: Two grades will be given for each project, including the final exam.

Example (A/A): the first A represents concept, the second A represents professionally finished work. Grades are then averaged as follows:

A = 4 points	Grades will be added together and averaged.
B = 3 points	Example: $A/B = 4 + 3 = 7$ divided by 2 = 3.5 (B+)
C = 2 points	Perfect Attendance (attending each class period) will raise a student's final grade to the next highest level; therefore, the
*D = 1 point	B+ becomes an A.
*F = 0 points	

- D. Written exams or pop quizzes over certain reading assignments will be given at the discretion of the instructor. These test grades will figure accordingly to the final semester grade.

❖ If these grades are earned, the student is encouraged to confer with the instructor for remediation.
